

Description

It is specially designed to cooperate with mobile training vehicles to realize the microphone sound amplification function and the sound is clear and bright.

Feature

- * Professional integrated structure design, good cabinet sealing performance, fast-conducting all-copper nickel-plated grounding post; in line with the certification standard of IP54 protection class.
 - * Built-in 25W digital amplifier module, delicate sound quality and strong power.
 - * Powered by DC24V/1.5A, the noise floor is small.
 - * Digital product, easy to extend, no geographical restrictions, easy installation.
- Adopt 3.5mm audio interface input, which is suitable for popular audio input interfaces and is convenient for sound amplification.

Specification

Protection class	Ip54
Speaker unit	2"×4
power	25W(MAX)
Maximum power consumption	30W
Operating Voltage	24V/1.5A
Operating temperature	-20°C ~ 60°C
Working humidity	20%~80% relative humidity, no condensation
Size (L*W*H)	83×88×294mm
Weight	1.45kg
