

Description

The equipment has the characteristics of clear sound and good low-frequency speed. The rated power of the device is 200W; the maximum power is 400W.

Feature

- *Equipment speaker unit: 8"×1, 1.5"×1.
- *The tweeter uses a silk film soft dome speaker unit.
- *It adopts high-grade PP disc diaphragm and large-diameter magnetic circuit system.
- *Equipment impedance: 8Ω; equipment sensitivity (1W/1M): 92dB±3dB

Specification

Equipment type	For indoor high-quality and high-power ceiling speakers
Device frequency response (-10dB)	50-20KHz
Equipment applicable places	Restaurants, cafes, hotels and other conference venues and supermarkets, shopping malls, waiting rooms and other public places
Size	280×115mm
Weight	3.5kg
Equipment installation opening size	245mm
