

Description

Suitable for hotels, shopping malls, supermarkets, schools, leisure and entertainment places, etc.

Features

- 1.The indoor luxurious wooden sound column has a wooden structure and adopts surface veneer technology, which has a delicate texture and effectively avoids the sound coloration caused by speaker resonance .
- 2.It has a built-in 4-inch full-range speaker unit and adopts a full-paper folded ring cone, which provides delicate, soft, clear and full sound quality .
- 3.The brown tight mesh design effectively prevents the speaker from being damaged by dust .
- 4.Adopts low distortion 70/100V transformer .
