

Digital Conference System Extension Controller

Embedded software: full digital conference audio transmission software V4.41

TS-0604ME

Feature

- * Used with the standard digital conference controller to expand system capacity by connecting more units.
- * Each extension controller can connect 128 units after connecting to system.
- * Support cascading of 32 extension controllers.
- * It has passed the 3500V high voltage test when leaving factory.
- * Metal housing and internal circuit are well connected to the ground wire to ensure the 8000V anti-static capability.
- * 2U metal cabinet can be mounted in the standard 19-inch rack, convenient for installation and maintenance.
- * Built-in universal power supply.

Specification

Model	TS-0604ME
Power Supply	~90-132V/180-264V 50/60Hz by switch
Static Consumption	10W
Output Power	340W
Audio Output	Level 2Vp-p Impedance:100Ω Unbalanced
Frequency Response	60Hz-16KHz
SNR (S/N)	>75dB
THD	< 0.5%
Over Carrier Distortion	<1%
Crosstalk Attenuation(1KHz)	>50dB
Interface	8-pin plug × 5 / three-core AC main power socket
Color	Black
Weight	2Kg
Dimension (L ×W×H)	484×305×88mm
