Intelligent Network Extender

TS2400-2P /customized/

Main features:

● Support port auto flip function.
● With 24 gigabit ports and 2 independent gigabit optical ports.
● Support port mirroring and bandwidth control.
● Support Web management method.
● · Support IEEE802.3x flow control.
● Auto detection of the receiving end; auto power management.
● The network port supports lightning protection.
● With built-in AC-DC power supply.
● The AC input port supports lightning protection.
● Support working temperature of 0℃～40℃.

Specifications:

Exchange capacity	52Gbps
MAC capacity	8K
Hidden port	4M
POE port	-
Uplink SFP	2GE
Chassis size	440*208*44
POE power	370W
Standard POE	802.3af/at, the maximum output of the port is 30W
Power supply	100~220V, 50Hz±10%
Operating mode	Standard switching, long-distance transmission, VLAN isolation
Environmental requirements	Working temperature/humidity: 0℃-50℃, 10%-90% non-condensing Storage temperature/humidity: -40℃-70℃; 5%-95% non-condensing
Working temperature	-10℃~60℃
Relative humidity	5%-90%, no condensation
