

## Description

It adopts a stainless steel spherical design, built-in omnidirectional microphone head, and a sensitivity of -40 dB, which can meet the requirements of ultra-long-distance sound pickup. The ultra-wide frequency response range highly restores the human voice, and the built-in 48V phantom amplifier processing circuit can achieve high-quality long-distance transmission and can be used with a microphone processor.

## Specification

Microphone sensitivity	-40dB±2 dB
Frequency response	100Hz~ 15KHz
Interface	Mini XLR connector (male)
Pickup distance	Height : 2.2 m , Radius : 3 m
Operating temperature	-10°C~45°C
Operating humidity	20% ~ 80% relative humidity, no condensation
Operating voltage	DC48V
Size	Φ 53*53mm
Weight	0.064kg
