

Description

Wall-mounted fixed-impedance passive speakers, with wall-mounted network amplifier terminals, are installed in ordinary classrooms, station waiting rooms, building lobbies, shopping malls, prisons, hospital departments and other places for sound source amplification.

Feature

1. The integrated box design uses microwave ultrasonic sealing technology to avoid noise caused by air leakage.
2. Built-in professional two-channel frequency divider module, with self-developed tweeter and woofer units. The sound is full of dynamics.
3. The back panel has a red and black wire clamp terminal for hidden wiring.

Specification

Rated power	10W
Sensitivity	90dB/1m
Impedance	8Ω
Frequency response	80Hz-16kHz (+1dB/-3dB)
Net weight	1.25kg
Dimensions (L x W x H)	147×100×290mm
