

## Description

The device is connected via a digital network and is used to remotely control program playback. It can be used for temporary control of programs during campus calisthenics or sports meetings.

## Features

- \*The equipment uses ABS+PC environmentally friendly materials, which are impact-resistant and wear-resistant; the machine has a compact appearance, which is convenient for project installation and placement.
- \*Super long remote control distance, up to 1 km outdoors (barrier-free), 200 meters indoors; at the same time, you can customize the preset remote control disabled time period, and set the start time and end time of each group.
- \*The system platform supports 12 preset task keys, which can realize the playback of any music at any time, on any number of terminals and at any volume.
- \*The system platform supports 7 preset function keys, which can realize new/switch, pause/resume, stop, previous song, next song, volume up and volume down operations for the current task.
- \*Support setting the power button, long press to shut down, short press to turn on, and it will automatically shut down after 1 hour.

## Specification

Network interface	Standard RJ45 input
Support agreement	TCP/IP, UDP, IGMP (multicast)
Operating frequency	433MHz
Antenna	Stretchable
Operating temperature	5°C ~ 40°C
Working environment humidity	20% ~ 80% relative humidity, no condensation
Power consumption	≤5W
Input power	DC12V/1A
Dimensions ( L×W×H )	149.07 × 125.2 × 29.74 mm
Net weight	0.2 kg
