

Description

A high-performance photoelectric converter that can realize the mutual conversion between optical signals and electrical signals. It has the advantages of long-distance transmission and stable signals that are not easily interfered with. It is convenient to connect to terminal equipment and can simplify on-site wiring.

Features

- *4-channel Gigabit Ethernet ports;
- *1-channel optical fiber interface, supports hot plug;
- *Adopt single-mode dual-core, LC interface optical fiber, transmission distance 20km;
- *Transmission rate: 10Gbit/s;

Specification

Working power supply	DC 12V
Device size	140mm×88mm×28mm
Equipment net weight	0.3Kg
Rated power	5.0W
