

Signal amplifier

TF-SL7731

## Feature

- 1.DMX512 male and female interface input.
- 2.Input and output photoelectric isolation.
- 3.8 independent amplified driver outputs.
- 4.Signal amplification and shaping function extends signal transmission distance.
- 5.The ability to enhance the number of devices connected to the data bus. Protect the DMX512 output interface of the lighting console, isolate the fault site, and improve the safety and reliability of the digital lighting control system.
- 6.Independent LED signal indication.

## Specification

<b>Input voltage</b>	AC 110-240V 50/60Hz
<b>Output</b>	DMX512/1990 signal
<b>Product size (L×W×H)</b>	482×165×44.5mm, international standard 1U size
<b>Packaging size (L×W×H)</b>	525×225×105mm
<b>Gross weight</b>	3.5kg
<b>Net weight</b>	2.7kg
