TF-SL7752

## Description

Designed to meet the needs of performing groups for flexible power supply and distribution in a small area, it is an indispensable auxiliary equipment in performances.

## Features

1. 24 channels × 4kW output power, suitable for any load.
  2. Equipped with ABC three-phase working indicator light, three-phase independent voltage, current and monitoring.
  3. Overload and short circuit dual protection high breaking air switch.
- Three output modes are available: bakelite plug 32 A / 16A waterproof plug / 19-core plug.
5. Adopt international standard 9U dimensions.

## Specification

Input voltage	AC380V±10% 50Hz±5%
Work Environment	IP20/Indoor use
Product size (L×W×H)	590×670×610mm
net weight	48.3kg
