

Description

Designed to adapt to the flexible power supply and distribution of performance groups in a small area, it is an indispensable auxiliary equipment in performances.

Feature

1. 12 channels × 4kW output power, applicable to any load.
2. Equipped with A/B/C three-phase working indicator light, three-phase independent voltage, current, and monitoring.
3. High breaking capacity air switch with dual protection against overload and short circuit.
4. Import terminal input, single 32 A bakelite plug output.
5. Adopt international standard 3U form factor.

Specification

Input voltage	AC380V±10% 50Hz±5%
Working environment	IP20/indoor use
Product size (L×W×H)	415×485×133mm
Packaging size (L×W×H)	535×465×205mm
Gross weight	11.8kg
Net weight	11.2kg
