

Features

- * Built-in digital amplifier with low power consumption.
- * Built-in digital echo processor and anti-sidetone circuit.
- * Rich status indicator LED, task prompt tone.
- * The terminal uses aluminum brushed profiles, CNC precision machining.
- * Terminal offline alarm function.
- * High-end call button.
- * Support 1000m network cable transmission with independent power supply, while 300m no need power supply.
- * Support 24V power supply.
- * Very low power consumption design.
- * On-wall or in-wall mounted optional.

Specifications

Project	Amplifier output
Network port output level	2W/4R
Frequency response	200Hz ~ 3.4KHz / ± 3 dB
Distortion	THD+N $\leq 1\%$
Noise test	≤ 2 mV
Input sensitivity	Network port: 775mV ± 40 mV MIC: 180mV ± 20 mV
